

Paleta Plus Cart - Made in the US!

The Paleta Plus cart was designed with a more sophisticated look, extra perks, and a faster turnaround—without sacrificing the quality our customers know and trust. Customize it with your brand colors, add your logo, and top it off with the perfect umbrella.

- The body and cooler is made of fiberglass with a standard all-white gel coat finish. Custom gel-coat colors available.
- Polyurathene insulated cooler with drain (thicker insulation than the Paleta cart).
- Storage bin & 7 cold plates are included.
- Heavy duty caster w/ lock and 2 x heavy duty 20" bicycle tires.
- Umbrella and menu holder w/ tightening screws.
- Vinyl umbrella included (i.e. mint/white shown above, available in different colors).
- Optional umbrella choices are shown below.
- Optional - Custom color and/or logos.
- The cart is shipped in a 32 x 32 x 32" double-wall box strapped to a pallet.

FAQs

How do the cold plates work? - The cold plates should be frozen 12-24hs before their first use at -10 to -15F.

How long will my products stay frozen? - There is no exact answer to that. It depends on how often you open the hatch door, how hot it is, and the product you are serving. Usually, for deep frozen water water-based paletas, 6-8 hrs. Please be mindful when opening the hatch door, add two extra cold plates at the bottom if you wish, or use dry ice on very hot days.

How do I transport the cart? -

We recommend Northern Tools scooter platform. Great quality, easy to assemble, and the cart fits the platform perfectly. You can hitch it to larger cars with the appropriate installation. Weight bearing - 500lbs. Link [here](#). Free shipping!
